Beings fair and bright, who reund us hover In earth's light uncertain, half a shade! Searce your levelitiess our eyes discover, Ere from our house-boners ye swiftly fade: Why so like the dowers!

With the halmy breathing of their spring, impound of ill, some mil away; Boftly borne by mixing angel's wing, Far from earth's chill airs or sorching ray; Heatonly-unriared flowers?

In the midst of Life's unclouded splender, Others stricken, without surring, fall; Stalwart man, or woman sweet and tender, Come and strew upon their heavy pall. Mournful yeve-pale flowers!

Garners full in Autumn's tranquil weather, Gorgeona hime light up the woodland scene; But the grass and finence ile dead together O'er the mounds that Summer saw so green-Over other flowers!

Mandle pure for all the landscape wearing, Hidelh Winter all that falls or fades: Withered grass in shining crystal leaving, Mimmic flowers along its prisoned blades, Cold and sentless flowers!

Thus, while from our middened pathway findath
One and other, in their mern or moon,
Or when ere the forward prospect shadoth,
Either lot may indeed be a been;
Early taken still the perfenne lingers,
Waffed from the crushed and fallen leaves:
Later, Autumn's consecrating fragers
Take our treasures; last, the arm receives,
Helding both our joyousness and wo
In its keeping, e'en as Winter's anow
Helds the barried flowers!

Soon our vanished flowers will reaswaken, Leiler, lesting bready with them both: Ne'er again by rathless wild winds shaken, Ne'er in darkness, mourning for the mor Ever-living flowers!

Agricultural.

Rems from the Horticulturist. Keeping boquets is an important cousidplace the one in the mouth of a narrownecked jar of water, and arrange the other
over a shallow dish of water, and it will be
perfectly fresh, days after the former are
faded. If a larger dish with water in it, is
placed below, and a bell glass set in the
water, so that no external air can enter, the
idge, of Perry in this county, went out last
lookers be introduced. Chackes Hillian, Kensington,
Mess Clement, West Amesbury,
Mess Clement, West Am water, so that no external air can enter, the rounded by air incessantly moistened by wapor from the plates.

so cruel to many sorts of trees as to let their
Painesville Telegraph. tender fibres parch up in a dry wind, or a bright sun. Such weather may be fun to you, but 'tis death to them.

Hives, in which swarms of bees of the previous year have died, should be kept clean and dry, and out of the way of mice, for the purpose of hiving new swarms in Ladies Liste Gloves, Ladies Dress Butt them.

Some of the old gardeners have an idea that old cucumber and melon seeds produce plants more fruitful than those from new seeds. The most luxuriant plant is produced from the good, sound plump new seed.

STIRRING THE SOIL -- As soon as crops appear above ground, the soil should be carefully stirred around them. This is one of the advantages derived from drill culture, and a very important one it is during dry sensons. The deeper the ground is loosened, the better it will support vegetation; the loose ground on the surface acts as a mulching and prevents the rapid evaporation of the moisture from below. The air is also am allowed unimpeded access to the roots, facilitating those electro-chemical changes upon which the growth of the plants so much depends, Heavy summer showers more or less consolidate the surface of all soils; surface stirring should therefore follow immediately after rains, and never allow weeds to gain sufficient headway to suggest the use of the hoe, but let the cleanliness and freedom from weeds be a consequence of repeated surface cultivation.

Sweet corn, summer squash, and vegeta ble marrows, may be planted at intervals of the two or three weeks, if a constant supply of tender vegetables is anticipated.

Peas, tomatoes, etc., may be hastened to maturity by pinching out the points of the plants. Checking growth will induce a tendancy to early fruiting.

In transplanting, always puddle the roots in a mortar of soil and water, unless the weather is dull and showery.

LAWNS must be frequently mown to look well; rake the cut grass quite clean. A hard broom will answer for small plots. In more extensive places, the patent grass or daisy rake is indispensible. Cut early in the morning when there is copious dow and clean up immediately, if you wish to economize labor. A smooth, green lawn suggests repose and quiet; all necessary labor, in keeping should therefore be perform ed in the most expeditious manner .- Ohio Cultivator.

What Can be Bone in a Garden. Thirty years ago, I purchased an establishment, consisting of a dwelling house, barn, carriage and wood-house, calculating to make it a permanent residence. There White Wheat Flour-Warranted-in Bar was attached a little land for a garden, on which were just five apple trees, and in Bio and Java Co. front three Balm of Gileal; the trees were all about six inches in diameter at that time; but two of the apple trees were hollow, and I cut one of them down, after trying to

I cut one of them down, after trying to make it do something and finding I could not.

Well, all the apple trees bore something for fruit, and so erabbed and sour they would make a pig squeal. At this time I was engaged as a trader, and had a country store to look after, which occupied all my time; but as time went on, and stage-coaches and milroads succooced one another, I had more time; for I can now travel as far in four hours as I could then in two cutire days with my team. Well, for amusement I grafted all the four gradually, or year by

Ciyde, Ohio, March 28, 1856, YOUNG AMERICA

EXCELSIOR

CORN AND COB MILL Manufactured by HALL & ALLEN, Mans field, Ohio, Wholsesale and Retail. The above cut represents the Millforgrinding the Corr and Col in the ear, and has the most valuable improve-ments in portable Curra and Cole Mills, and is adapted to the various Grinding and Cresting purposes for feeding Il kinds of Stocks which system of fielding is now re-pured, and found proutfalled by experience

quired, and found promision of experience.

One great advantage this Mill has over all others is, the
the grinders are made on movable rings, which are
can of hird metal and when worn out can be replaced by see rings in five minutes, for the
sum of three dollars, then the mill is the
sams as new, as there is no other part
liable to wour out. This Mill was AWARKED THE FIRST PREMIUM AT THE

OHIO STATE FAIR, sent year (1815,) in a fair trial with the Little at, and all other Mills brought in competition, of the preference and admiration of all adjoining The Execution Mill will grain from eight to fifteen bushcle per hour, according to the degree of times of meal and
quality of carn, and can be worked with one active burses.

It is a well known fact by scientific formers, and among
stock foeders, that twenty bushels of cure and only ground
tagether, will go as far, or further than thirty bushels fed anground to any kind of stock,—and will fatter
stock in one third less time than when fed unground.

Having been augminded Agents for the sale of the above
Mills, we take pleasure in announcing to the Tarmer's gencult, that we are prepared to fill all order with distance,

A Mill that will make two hundreds of corn equal to there,
such to be on every farm.

ROBERTS & SHELDON.

The proprietor in calling the attention of the public to this preparation, does so with a feeling of the atmost confidence in the virtues and slaptation to the diseases for the proprietor in the properties of the properties of

this preparation, does so with a feeling of the atmost considerace in its witness and adaptation to the diseases for which it is recommended.

It is no new and untried article, but one that has stood the test of a ten year's trial before the American people, and its exputation and sole is unrivalled by any similar preparations extant. The testimony in its favor given by the most prominent and well known physicians and hadridnia in all parts of the country is immense.

Thowas Larentzonn, Covington, Ky., Dec. 27, 1833, says offly with has been smitted with the liver conscioute and dyspeppin for a number of verry, during which though have spents great deal for detecting, but she verieved very filter benefit thereform, and finally the detector solicitude could not be caused. Last spring size concluded to try your Blitters, the took two bottless, and ever since taking them she has been able to attend to her burdiness. I have sold quite a number of bottles through her recommendation, and as far as I can learn it has given eatisfaction to all.

Davin Aussert, Austicherryll, Ohlo, Dec. 5, 1833, says: (Permit me to hear testimenty to the remarkable officacy of your German littlers, in the cause of liver complaint. Per very new new thirty is taking it, I was severely affiliated with disease of the Here, so much so that I did not expect to the year new testiments of the litters, thinks on a kind I revellence, I find my self entirely restored to health and able to resume my nead employment.

These Bitters are entirely expended, and free from all injurious ingredients.

CONTENTS.

It teaches how to make one in the new of its own. It teaches every eye to form a beauty of its own. It teaches how to not when finefinated by a lady, It teaches how to under the wrighted face smooth. It teaches you the kind of wife to select to render home. appy. It gives advice to the lover who has been once truly a opted, and is rejected afterward through the interferen

copies, and is rejected afterward through the interference of tirnels. It pires a reasedy for unrequited love. It pires you instruction for beautifying the person. It pires you instruction for beautifying the person. How to have a handsome feve and hands. How to remove tan and freekles. A lecture on love, or a private advice to married ladies and gentlemen.

This is decidedly the most fascinating, interesting and really useful and gractical work on Courtship, Matrimory, and the delights of Married Life, that has ever been issued from the American press. The artificial social system, which in so many instances prevents a union of hearts, and socialize to conventionalism the happiness and even the fives of themsands of the young and hopeful of both sayes, is thereaghly analysed and exposel. Every one who conventions marriage, and wishes for an infallible gride, in the selection of a partner for He, should purchase this great text book of commission folicity.

No one will ever expect the price paid for such an invaluable secret.

Premont Journal, or
September 25, 2855.

Rollersville, O.

CATHARTIC PILLS CATHARTIC PILLS

OPERATE by their powerful influence on the internal viscera to purify the blood and atimulate it into healthy action. They remove the obstructions of the stomach, bowels, liver, and other organs of the body, and, by restoring their irregular action to health, correct, wherever they exist, such derangements as are the first causes of disease. An extensive trial of their virtues, by Professors, Physicians, and Patients, has shown cures of dangerous diseases almost beyond belief, were they not substantiated by persons of such exalted position and character as to forbid the suspicion of untruth. Their certificates are published in my American Almanac, which the Agents below named are pleased to furnish free to all inquiring.

Annexed we give Directions for their use in the complaints which they have been found to cure.

Fon Costiveness.—Take one or two Pills, cresuch quantity as to gently move the bowels. Costiveness is frequently the aggravating cause of Pills, and the cure of one complaint is the cure of both. No person can feel well while under a costive habit of body. Hence it should be, as it can be, promptly relieved.

Fon Dyslawia, which is sometimes the cause of Costiveness, and always uncomfortable, take mild doses—from one to four—to stimulate the stomach and liver into healthy action. They will do it, and the heartburn, bodyburn, and southurn of dyspepsia will rapidly disappear. When it has gone, don't forget what cured you.

For a Four Stomach, or Morbid Inaction of the Spaceis, which produces general depression of the spirits and bud health, take from four to eight Pills at first, and smaller doses afterwards, until activity and strength is restored to the system.

For Nenvousness, Stox Headachie, Nausea, Paus in the Stomach, Back, or Side, take from four to eight pills on going to bed. If they do not operate auffluently, take more the next day until they do. These complaints will be swept out from the system. Don't war these and their kindred disorders because your stomach is foul.

F OPERATE by their powerful influence on the

seeds of incurable diseases will be swept out of the system like chaff before the wind. By this property they do as much good in preventing sickness as by the remarkable cures which they are making every

where.

LIVER COMPLAINT, JAUNDICE, and all Billious Affections arise from same derangement—either torpidity, congestion, or obstructions of the Liver. Torpidity and congestion vitiate the bile and render it unfit for digestion. This is disastrous to the health, and the constitution is frequently undernined by no other cause. Indigestion is the symptom. Obstruction of the duct which empties the hite into the stomach causes the hile to overflow into the blood. This produces Jaundice, with a long and dangerous train of evils. Costiveness, or alternately costiveness and diarrhea, prevails. Feverish symptoms, languor, low spirits, weariness, restlessness, and melanchoty, with sometimes inability to sleep, and sometimes great drowsiness; sometimes there is severe pain in the side; the skin and the white of the eyes become a greenish vellow; the stomach acid; the bowels zore to the touch; the whole system irritable, with a tendency to fever, which may turn to bilious fever, bilious colic, bilious diarrheas, dysentery, &c. A medium dose of three or four Pills taken at night, followed by two or three in the morning, and repeated a few days, will remove the cause of all these troubles. It is wicked to suffer such pains when you can cure them for 25 cents.

Rusumation, Gott, and all Inflammatory Facers are rapidly cared by the purifying effects of these Pills upon the blood and the stimulus which they afford to the vital principle of Life. For these and all kindred complaints they should be taken in LIVER COMPLAINT, JAUNDICE, and all Billious these Pills upon the blood and the stimulus which they afford to the vital principle of Life. For these and all kindred complaints they should be taken in mild dones, to move the lowels gently, but freely.

As a DINNER PILL, this is both agreeable and useful. No Pill can be made more pleasant to take, and certainly none has been made more effectual to the purpose for which a dinner pill is employed.
